

BradfordTM optimoTM underfloor

OptimoTM StayFastTM

EASY INSTALLATION FROM ANY ANGLE

Ideal
for
D.I.Y

Optimo StayFast brackets make installing Optimo Underfloor batts in existing homes easy, even in cramped conditions.

Optimo straps are great, but it can be difficult to hammer or drill them into place when underfloor access is constrained or when floor joists are made from hardwood or steel.

With a convenient adhesive strip, Optimo StayFast angled brackets easily stick to any floor joist and hold batts securely in place from below.

For a new build where installation occurs from above, Bradford recommends Optimo saddles be used as a quick, efficient solution.

Install instructions

BEFORE YOU BEGIN INSTALLING OPTIMO

TOOLS NEEDED

- Tape measure
- Retractable knife
- Disposable dust mask
- Torch
- Eye protection
- Long sleeve shirt

Switch off power at the fuse box. Measure your floor joist spaces. Usually 450mm centres or 600mm centres.

For 450mm centres use 415mm wide batts. For 600mm centres use 565mm wide batts. Trim batts with knife if too wide.

Take enough packs into the underfloor area for the whole job where possible. Start fitting insulation from the furthest point from the underfloor access.

Note: As access and workspace can be restricted 2 people may be required for installation.

INSTALLING OPTIMO USING OPTIMO STAYFAST™

STEP 1

Friction fit Optimo batts tightly between the joists and press in place to ensure there are no gaps between the insulation and joists, or abutting edges (ends) of insulation.

STEP 2

Remove adhesive backing from Optimo StayFast™ bracket.

STEP 3

Position Optimo StayFast™ bracket on the side of joist, aligning the bottom of the bracket with the bottom of the joist as shown. Apply pressure to adhere.

STEP 4

Space StayFast™ brackets 300mm in from each end of the Optimo batt which gives 2 brackets per side per batt.

PIECES PER BOX	COVERAGE PER BOX		PRODUCT CODE
