# FOILBOARD® INSTALLATION GUIDE

To achieve maximum thermal performance and to ensure the fast and simple installation of Foilboard® GREEN rigid insulation panel to underfloor systems, Foilboard Australia recommends the following method.

What do you need?

Use Foilboard® Standard Fasteners for GREEN 10 and GREEN 15 OR Foilboard® Ultra Fasteners for GREEN 20 and GREEN 25 (Use Timber or Steel fasteners depending on application)

Foilboard® Green OR Silver joining tape

How to Install?

STEP 1
Install the Foilboard GREEN panel against the bearer (Below joists)
STEP 2
Fix the panel using 3 Foilboard Fasteners per joist in between bearers.

STEP 3
Use full sheets of Foilboard GREEN panel in the areas that they fit. Then measuring and cutting the smaller areas

STEP 4
Join sheets together and continue along underfloor cutting around any services as required

STEP 5
Use either Foilboard GREEN or Aluminium tape to seal the butt joins between the panels and any other minor gaps

TOP TIPS

✔ Install Foilboard® after the framing and plumbing have been completed prior to electrical services

✔ You can use Foilboard Green or Silver joining tape or a neutral cure silicon to seal any minor gaps

✔ The Foilboard® GREEN antiglare is there to protect you. Both the antiglare and silver foil reflect heat.
